Main Road, Kallyanpur,
Dhaka-1207

CAREER OBJECTIVE

Meticulous GIS Analyst with a strong foundation in problem-solving and critical-thinking skills. Adept at creating digital presentations of spatial and geographical information with extensive experience in remote sensing, spatial modeling, and GIS applications. Seeking opportunities to leverage my expertise and contribute to innovative projects.

WORK EXPERIENCE

Urban Development Directorate

Junior GIS/RS Expert

Oct 2024- Present

- Preparation of topographic settings, physical features, land use, and other related thematic maps of the area.
- Conduct spatial data analysis and visualization for the project Classify land use and land cover (LULC) in remote sensing imagery by processing.
- Assist in developing GIS-based models for spatial planning, hazard assessment, and infrastructure management.
- Prepare technical reports, maps, and presentations for stakeholders and project meetings.

Center for Environmental and Geographic Information Services (CEGIS)

Research Consultant

Jul 2023 - Sep2024

- Manage and maintain geo-spatial databases to ensure data integrity and accessibility.
- Prepare and digitize GIS layers for spatial analysis and mapping.
- Conduct edge matching to ensure seamless integration of digitized layers.
- Process and analysis of satellite imagery for various applications, including planning and monitoring.
- Classify land cover using satellite imagery and extract cropping patterns.
- Conduct accuracy assessments and perform statistical analyses to validate classification results.

Development Design Consultants Ltd. (DDC)

GIS Analyst

Jan 2023 - Jul 2023

- Georeference Mauza maps to align with spatial datasets for accurate analysis.
- Digitize individual Mauza maps and perform error calculations to ensure data accuracy.
- Conduct edge matching of digitized maps to maintain spatial continuity.
- Design and develop data collection formats for various levels of digital and field-based surveys.

Jagannath University, Dhaka, Bangladesh

Research Assistant

Jan 2021 - Dec 2022

- Acting as a GIS and RS Analyst.
- Drone Image Capturing and Orthomosaicing
- Writing research articles.
- Designing presentations summarizing research findings.
- Developing research objectives and proposals.
- Maintaining communication with faculty supervisors.

EDUCATION

Master of Science in Geography and Environment	2019– 2020
Dept. Geography and Environment Jagannath University, Dhaka, Bangladesh	
GPA: 3.91 / 4.00	
Bachelors in Geography and Environment	2016 – 2019
Dept. Geography and Environment Jagannath University, Dhaka, Bangladesh	
GPA: 3.69 / 4.00	

PROJECTS

1. A Pilot Project on Preparation of Comprehensive Development Plan for Nine Upazilas (9UpzCP)

Position: Junior GIS Expert

- Preparation of topographic settings, physical features, land use, and other related thematic maps of the area.
- Conduct spatial data analysis and visualization for the project Classify land use and land cover (LULC) in remote sensing imagery by processing.
- Assist in developing GIS-based models for spatial planning, hazard assessment, and infrastructure management.
- Prepare technical reports, maps, and presentations for stakeholders and project meetings.

2. Generation of the Land Cover and Natural Capital Map and Developing Integrated Collaborative Forest Management Plans

Client: Ministry of Environment, Forest and Climate Change

Position: Research Consultant

- Conduct comprehensive analysis using satellite imagery and remote sensing technology for Land-Use Mapping.
- Analyze GIS data for determine the land use class of the land.
- Utilize remote sensing and satellite imagery to interpret the forest area within the designated area.

3. Consultancy Services for Land Use Mapping using Satellite Images and Remote Sensing Technology

Client: Ministry of Land, Bangladesh

Position: Research Consultant

- Conduct comprehensive analysis using satellite imagery and remote sensing technology for Land-Use Mapping.
- Analyze GIS data for determine the land use class of the land.
- Utilize remote sensing and satellite imagery to interpret the cropping patterns within the designated area.

4. Understanding People's Perception, Coping, and Adaptation Strategies to Landslide Hazard

Funded by UGC–JnU, 2020–2021, supervised by Dr. Neegar Sultana)

Position: Research Assistant

- Collect past landslide occurrences from remote sensing, satellite images, and field surveys to identify hotspots.
- Conduct community-based mapping to visualize people’s perceptions of landslide risk and adaptation strategies.
- Conducted GIS and remote sensing analysis to assess landslide-prone areas.
- Assisted in spatial data collection, processing, and hazard mapping using GIS tools.

5. People's Perceptions and Attitudes to Environmental Pollution and Its Impact in Dhaka City

Funded by UGC–JnU, 2020–2021, supervised by Dr. Najmun Nahar)

Position: Research Assistant

- Conducted GIS and remote sensing analysis to assess environmental pollution in Dhaka City.
- Assisted in spatial data collection, processing, and visualization using GIS tools.
- Designed and conducted field surveys to gather public perceptions on pollution impacts.
- Analyzed survey data and contributed to report writing and presentations.

PROFESSIONAL CERTIFICATIONS

- Esri MOOC Training – Climate Action, 2023
- Esri MOOC Training – Imagery Action, 2021
- Disaster Response Exercise & Exchange (DREE), Bangladesh, 2019.
- Online Certificate Course on Remote Sensing, Geo University, 2018.
- Remote Sensing Training Program, NASA ARSET, 2018.
- Certificate Course on Geographic Information System (GIS), Dhaka University, 2017.

ACADEMIC RESEARCH

- M.Sc. Thesis: Carbon Sequestration Potential in the Topsoil of Moheshkhali Upazila, Cox's Bazar Using Geospatial Techniques.
- B.Sc. Dissertation: Air Quality Analysis of Dhaka Metropolitan Area Using Geospatial Techniques.

PUBLICATIONS

- The challenges and coping of Rohingya refugees: A comparative study of registered and nonregistered Rohingya refugees in Bangladesh.' (<https://doi.org/10.1108/SEAMJ-04-2023-0033>)

SKILLS

- Project Management
- GIS data analysis.
- Remote Sensing Analysis (Satellite Image & Drone Image)
- Hydrological Analysis (Stream analysis, Ground & Surface water analysis, Riverbank erosion & accretion analysis)
- Teamwork
- Research Coordination
- Effective Communication
- Critical Thinking
- Map Making
- Documentation and Report Writing

TECHNICAL SKILL

- GIS applications expertise (ArcGIS, ArcGIS Pro, QGIS).
- Remote Sensing (ERDAS Imagine, Google Earth Engine (GEE) Data Management).
- Geostatistical analysis and spatial modeling.
- Programming: R & Python
- Aerial photography interpretation and mapmaking (Pix4D Drone Mapping).
- Proficiency in Microsoft Office and IBM SPSS.
